(54) Title: APPARATUS FOR AUTOMATED PROCESSING BIOLOGICAL SAMPLES

(57) Abstract: The present invention concerns an apparatus (1) for automatic processing at least one biological sample accommodated on a carrier member, such as a slide by (7) applying a predetermined amount of reagents in a predetermined sequence according to a processing protocol, said apparatus (1) comprising; a housing frame (4); at least one processing section for accommodating at least one slide (7), wherein the at least one processing section is provided within the housing (4); a hood cover protecting the at least one processing section in said housing (4); wherein the hood cover (40) completely encloses the processing section defining an interior space (120); and wherein the apparatus (1) further comprises climate control device (121) provided to control the environment within the interior space (120).
